SKILLS

Strong

C# and object-oriented programming, SQL and relational databases, Unity and Unreal Engine

Have programmed in

Python, Java and .NET

Used in projects, with AI

TypeScript, React Native and Expo, Next.js, Supabase and PostgreSQL, WordPress and PHP, Playwright, ffmpeg

3D, design and sound

Blender (including AI inside Blender), Maya, Photoshop, Illustrator, Krita, Reaper

Tools

Git and GitHub, Visual Studio, VS Code, App Store Connect, Google Play Console, Cloudflare, Sentry, Office

HOW I WORK

- AI writes code; I decide, review and test
- I learn each technology by taking it into a real project
- Creativity, critical thinking and teamwork

LANGUAGES

Spanish: native

English: C1 (Trinity College C1, 2019; Cambridge B2, 2014)

German: A1 (Goethe-Zertifikat, 2012)

Japanese: intensive course, University of León (2018)

INTERNATIONAL

Boarding school at Gordonstoun School, Scotland (2012 – 2014); scientific expeditions with Operation Wallacea (Indonesia and Croatia); NSLC Game Design, Washington D.C. (2018).

INTERESTS

Chess, volleyball, skiing, hunting, fishing, scuba diving, tennis, rugby and video games.

PROFESSIONAL PROFILE

Graduate in Video Game Design and Development (UNIR) and student of the Master's in Software Engineering. My foundation comes from the degree: C#, object-oriented programming, data structures and databases. On top of it I learn fast, taking each new technology into real projects: an app live on the App Store, an online store in production and its AI automations. Creative, a problem-solver and keen to contribute to a team.

EDUCATION

Master's in Software Engineering 2026 – present

UNIR · online

Generative AI for Business Applications 2026 – present

Advanced University Programme · UNIR · online

Bachelor's in Video Game Design and Development 2023 – 2026

UNIR · online · GPA 7.72 / 10 · 240 ECTS

Final Degree Project: Ad Aeternum, 9.0 (distinction). **Distinctions:** Gaming Devices (9.9), 2D Design (9.6), Interactive Systems (9.5), Web Games (9.2) and Ethical-Legal Issues (9.0).

Programming: object-oriented programming, data structures and algorithms, databases, software engineering and operating systems. **Games:** engines, AI, multiplayer, virtual and augmented reality, gamification, 2D and 3D design, sound, and three group projects.

Bachelor's in Interactive Product Design (not completed) 2018 – 2022

U-TAD (Camilo José Cela University), Madrid

American Dual Diploma and Bachillerato 2014 – 2019

Colegio Internacional Peñacorada, León

Foundations of Prompt Engineering 2026

AWS Training & Certification

EXPERIENCE AND PROJECTS

Internship (curricular and extracurricular) · Immersive Oasis 2026

American Frisbee: multiplayer virtual reality game for location-based entertainment. Unity 6, C#, local networking, PICO 4 and Quest 3.

tailt · gym management · personal project 2026 – present

Live on the App Store, in closed testing on Google Play and in use at a training centre in León. Mobile app and web panel on Supabase and PostgreSQL: multi-tenant with Row Level Security, 280+ migrations, Stripe payments, gamification, meal calories from a photo via an AI API, Apple Health and Health Connect, and GDPR-compliant health data.

ABCDalia · online store of teaching materials 2026 – present

Store in production on WordPress and WooCommerce, with its own brand, theme and plugin, plus Excel tools for teachers generated with Python.

AI-run social media system 2026

Prepares carousels, stories and reels with voice-over and subtitles a month ahead (Python, Playwright, ffmpeg); the owner approves them in a calendar and the website publishes them to Instagram, Facebook, TikTok and Pinterest.

Ad Aeternum · Final Degree Project 2025 – 2026

Cooperative-competitive educational game made with teachers from Asociación Arenales. Unity and C#.

Videos for a nightclub's screens · commission 2026

Blender loops rendered in layers that react to live music, plus a Unity mock-up to review them on Meta Quest 3.

More projects in the portfolio: investment portfolio web app, Unity games and Flutter apps.
